

Cycle Cabana® Motorcycle Storage Protection

**Protect Your Cycle from Moisture, Dust, Weather, UV Rays,
& Other Potential Damage**

An MDM Products Cycle Cabana is the ultimate protection answer for the Motorcycle Enthusiast to preserve their cycle in pristine condition. The unique frame and cover design make it easy, fun, and effective to use. The 1" heavy tubular powder coated steel frame comes partially assembled and takes only minutes to complete with hand tools. The frame opens in an accordion type fashion in a single movement when ready to insert or remove the cycle. The engineered enclosure never comes in contact with a hot engine, exhaust system, or tires. The cycle can be put away completely as soon as the ride is completed.

The heavy duty one piece cover is secured to all frame members with multiple velcro straps. The cover contains two large integral vents for condensation prevention. The cover is a heavy duty long life material with commercially sewn construction for longevity. Rain and melting snow are drained away by the design of the the cover. An optional floor accessory is available if your storage area requires. Cycle Cabanas are available for a single cycle or a double cycle application. From the smallest scooter to the largest bagger, a Cycle Cabana is a very wise storage investment.
